Elite Milking Systems

Who Are We...

Elite Milking Systems was founded in 2006 by myself, Simon Blood with the aim of providing a dedicated and expert dairy parlour service & support company for our region. With many years experience in the dairy industry both on service, supply and installation; specialising on BouMatic equipment in particular, Elite Milking Systems has already grown in both customer base & staff, with a developing reputation for quality, reliability and customer service. As an example last year we installed, 20/20 gascoigne meter plant, 7/14 Boumatic GMI plus a 14/28 DeLaval Alpro system, a 38 point Boumatic Rotary and also 40 Heatime systems. Even though we are a UK BouMatic dealership, our collective experience at Elite Milking Systems mean we are capable of servicing any type of dairy installation, including Gascoigne Melotte, DeLaval, Westfalia and many more.

Mr Swift Staffordshire

BouMatic Xpedia 360IX:
38/40, Internal Rotary Parlour

Herd Size:
280

Installed by: Elite Milking Systems, Crewe, Cheshire

As Mr Swift increased his herd size to 280 cows, his old milking parlour could no longer cope with the demand and milking sessions were taking over four hours twice daily. A new investment was needed to provide a parlour that could give maximum milking productivity, as well as being gentle on his cows.

The BouMatic Xpedia 360IX Internal Rotary was chosen by Mr Swift because of the renowned quality BouMatic equipment has including reliability, robustness and technical excellence with every system, with the added benefit of low maintenance costs.

Since installation milking 280 cows is now completed in less than 2 hours per milking and the herd have settled quickly into their new environment allowing for swift and productive milkings.
